

Dear Fellow Investor

As small private investors, I feel we should share information to help each other, as we all look to build financial independence. Here's a small story from my side.

Shortly before I had my stroke 5 years ago I had taken time to rearrange my investments. I had found some fund managers who, like me, believe in the same investment model used by Warren Buffett. I had not previously been aware of these people.

Below are my investment returns per year for the funds I selected. How is your investment advisor doing?

Ralph Hahmann

Returns as of April 30, 2019 (fee based)	YTD	1 Year	3 Year	5 Year	10 Year	Morningstar Rating
US Blue Chip	18.32%	19.30%	23.69%	20.45%	18.88%	*****
Quartile Ranking		1	1	1	1	
US Mid-Cap	19.23%	20.08%	18.74%	18.05%	18.65%	*****

Quartile Ranking		1	1	1	1	

Yes, these are funds available for investment by any Canadian. As always, past performance does not guarantee future performance, but when a fund manager is consistently in the top 25% in their fund category, it is reasonable to believe that they will continue to be a top performer amongst their peers. This chart shows historical performance after fund management fees have been taken out, but before any advisor fees are charged.

If you want to know more about how I invest my money, feel free to make an appointment at <https://ralph.joinme.link>
